

Environmental Team Activity 2019

You are an agricultural producer and have been approached by a company to consider partnering in energy production. There is an offer for wind or solar energy harvesting on your property. Consider these offers and develop a plan. Present and justify the best option for your operation to the energy companies' board.

You have one hour to **prepare and print** your presentation. You will have 8 minutes to present your best option and 5 minutes to answer any questions.
