HP = Heifer Pregnancy

\$M = Dollar Maternal

\$B = Dollar Beef

\$C = Dollar Combined

Rank these females as potential replacements for an elite Purebred Angus operation in Central Kentucky. The primary source of income for this operation is from an annual production sale where they market females across the country to other purebred breeders. This operation has grown a reputation for producing females with mass and body with breed leading numeric profiles. Bulls from this operation are marketed through a cooperative agreement with a 40% split of the final sale price. Resources and labor at this operation are abundant.

Females provided by:

Horstman Cattle Company
