

NATIONAL FFA VETERINARY SCIENCE CAREER DEVELOPMENT EVENT

FREQUENTLY ASKED QUESTIONS

Updated: April 26

1. In reviewing the handbook, it had updated rubrics in 2025, and the 2026 Scenario Resource Guide has temporary (2026 event only) rubrics. I know several of these are included in the 2026 area, but I just wanted to clarify exactly which restraints and practicums students will need to know for the 2026 National event.

Practicums were chosen from the core list in the handbook AND the temporary 2026 list. As you can imagine, we cannot tell you exactly which practicums were chosen

2. In the 2026 Vet Science Scenario Resource Guide, for the Focus Areas, one is Emergent "in the canine and feline patient. Our question is "emergent"; does this refer to "emergency" or "new and emerging technologies, etc."?

For the scope of this event, consider “emergent care” synonymous with “urgent care”. This would include cases that need attention that day and not routine healthcare.
