

DO NOT REMOVE FROM CONTEST AREA

2016 Individual Event

A Judges

Information provided to the student:

Mr. and Mrs. Selman farm approximately 2500 acres of which 500 acres is dryland acreage and 2000 acres are irrigated acreage. They rotate their crops which include corn, cotton, canola, winter and spring wheat, soybeans, and sudan hybrids. They will also contract stocker cattle to graze on their acreage. Their local area has numerous dairy and beef cattle operations that are their customers. They have no children.

Supplemental information: STUDENTS MUST ASK QUESTIONS TO FIND OUT

Due to dry weather, the decision has been made to harvest the 400 acres of wheat and sudan for silage and you need a baler that will chop the silage as it is baled. You have also recently signed a contract with a dairy to provide alfalfa. You have planted 800 acres of alfalfa to fulfill your contract starting this summer. You will have to transport the alfalfa approximately 100 miles to its destination.

You have sold your current baler a 569 premium for \$45,000
