Twin States Snack Food Company
1890 Bentfield Ave.
Mountain View, Colorado

Complaint Department:

While I was eating your corn chips I noticed a dried insect (1 inch long) inside the bag. The bag was sealed before I opened it. After finishing the bag of chips, I lost my appetite and at times had difficult time breathing. I have no medical insurance or I would go to the doctor. Will you pay the cost if I go to seek treatment?

I still have the bag and insect and have called my attorney. I have also called the FDA and the Illinois Dept. of Health as my attorney told me to do.

I would like to know how this insect got in the bag and what you are going to do about it. I have been mentally suffering every since and can't even look at any corn chips or any other chips. I would also like a refund for the product.

Sincerely,

George Montgomery
