TO WHOM IT CONCERN:

Last evening I opened a package of your mini donuts. The package had an expiration date on the package of August 7, 2008. I noticed a very strong odor as I took one out of the package. The odor had a chemical smell like acetone or paint thinner, but I couldn't see anything wrong with the donuts or plastic package. I didn't eat any, but wanted to report the problem.

I have been buying these donuts for years, but now I'm afraid that maybe someone has tampered with it and put something in it. Have you had any problems at your donut plant?

I have put the donuts in the freezer and will be waiting to hear from you. In this day of terrorism, I become very concerned about our food.

Very Concerned,

Sammie Smith
