8	.79	7.9	154	100	101

SPI- Sow Productivity Index

TSI-Terminal Sire Index

*Underline and vulvas are considered sound.

Scenario: Choose four gilts to be used in an Indiana commercially focused pig operation. These gilts will be housed in sow lots. The firm wants to maintain their tradition of producing functional females with a terminal emphasis. The elite offspring will be marketed as show pigs while the remaining will be marketed on a yield grade basis.
