

Spect*(i)*cle[®]
TOTAL

Product

information sheet

// Active Ingredient: Indaziflam, Glyphosate, Diquat Dibromide

// Formulation: Flowable

// WSSA Group: 29, 9, 22

// Signal Word: Caution

Best Uses

// Non-selective control of weeds with quick knockdown and residual control

// Easily mixed in a backpack sprayer and can be used in both landscapes and hardscapes

// Specticle[®] Total gives landscape managers a powerful tool for controlling troublesome weeds

Attributes of Specticle Total

// Uses less active ingredient – resulting in less herbicide in the environment

// Rainproof in 30 minutes

// Visible results in hours

// Unique mechanism of action – controls weeds known to develop resistance to other herbicides

Key Strengths

// Delivers up to 6 months residual control – which means fewer treatments

// Offers more effective control than other typical preemergence products, resulting in fewer callbacks

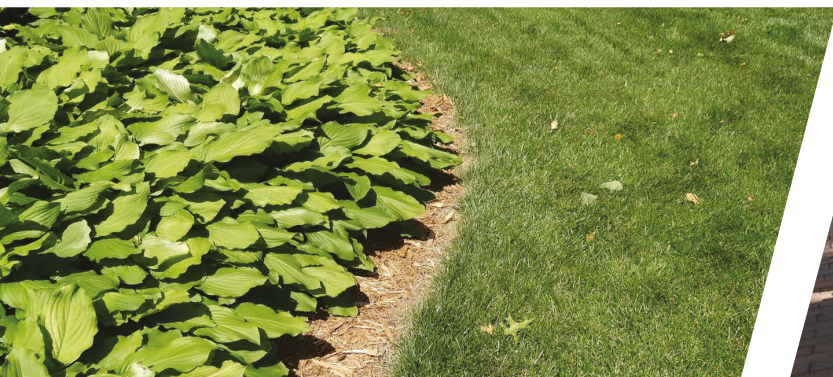

// Specticle Total is non-staining to hardscapes

How To Apply

// In a sprayer, mix 16 oz. of Specticle Total in 1 gallon of water to treat 1,000 sq. ft.

// Treat area to be protected from weeds; existing weeds will be controlled

// Avoid application directly to desirable plants including desirable turfgrass

Apply to edges of perennial beds to prevent turf encroachment. (Bayer)

Treat pavers to eliminate existing weeds and provide up to 6 months control. (Bayer)
