

The goal for the team activity, is to identify the medical findings and recommendations from both Hank and Ricky's veterinary evaluation and present to the judge as if they are the animal owner.

1. Share the top three medical findings from Hank's exam and their clinical relevance.

*Top Findings:*

- *Hank had a leg wound*
- *It required bandaging*
- *Hank required sedation*
- *Hank received NSAID's and antibiotics*
- *Identified Hank needed a dental float*

2. Share with Ms. Glenn at least three veterinary recommendations for the at-home wound and bandage care of Hank's leg.

*Judge's points:*

- *Bandage care – keep it clean and dry*
- *Look for swelling, dripping, odor*
- *Fly management*
- *Stall rest*
- *BCS – Diet and nutrition for stall care*
- *Pain management/monitoring*

3. Share the top three medical findings from Ricky's exam and their clinical relevance.

*Top Findings:*

- *Ricky's skin is itchy and infected. (Pyoderma)*
- *Ricky has an ear infection. (External otitis)*
- *Ricky has coccidiosis.*
- *Ricky is sore from a horse's kick.*
- *Ricky has a tick infestation.*

4. Share with Ms. Carroll at least three veterinary recommendations for the at-home management of Ricky's multiple diagnoses.

*Judge's points:*

- *Give Simplicef, an oral antibiotic, to treat Ricky's pyoderma.*
- *Apply EasOtic to each ear daily to treat yeast otitis.*
- *Give Albon as directed to control coccidia infection.*
- *Watch for itching to return after 6-8weeks, when Cytopoint may need boosted.*
- *Use a monthly flea/ tick preventative in addition to the annual Proheart12 injection.*
- *Monitor for continued lameness from Ricky getting kicked by the horse.*
