

2013 National FFA Horse Evaluation CDE

Nutrition/Feeding Practical Activity

State _____ Activity Leader Initials _____

You will have 10 minutes to complete this activity using the packets and calculators provided. Please read instructions carefully.

Scenario 1-Use Packet #1

1. Which of the three feed tags has the highest amount of protein based on the guaranteed analysis given an equal amount of pounds fed for each feed?

2. What is the primary ingredient of the Coolmax Competitor complete feed?

3. Using the general feeding guidelines and the highest recommendation, calculate the recommended daily quality hay amount you should feed to a 1050 lb. horse.

Scenario 2-Use Packet #2

4. Which complete feed has the highest fiber %?

5. Which complete feed has the minimum guaranteed analysis amount of copper?

6. Using the 14% COOLMAX COMPETITOR tag, if you feed 5 lbs. of feed per day, how much would be the minimum crude protein pounds feed per day based on the guaranteed analysis?

Scenario 3- Use Packet #3

7. Which supplement provides the least amount of calcium based on the guaranteed analysis?

8. Which supplement has an oilseed crop by-product as the primary ingredient?
