Moro

SWH(WHCB)

Top View:

Shape

slight to medium degree of
locality conformity

Texture

smooth

Germ

small to medium, oblong to oval
off-centered
sometimes has a crease in middle of germ

Sides

tapers from shoulders to brush
twisted
non-symmetrical

Side View:

Germ

low to high angle

Back

slopes from germ to brush
hump directly behind the germ
sometimes smashed at brush end

Brush

light and short, rarely has a goatee

Bottom

flat to s-shaped (hooked)

Bottom View:

Checks

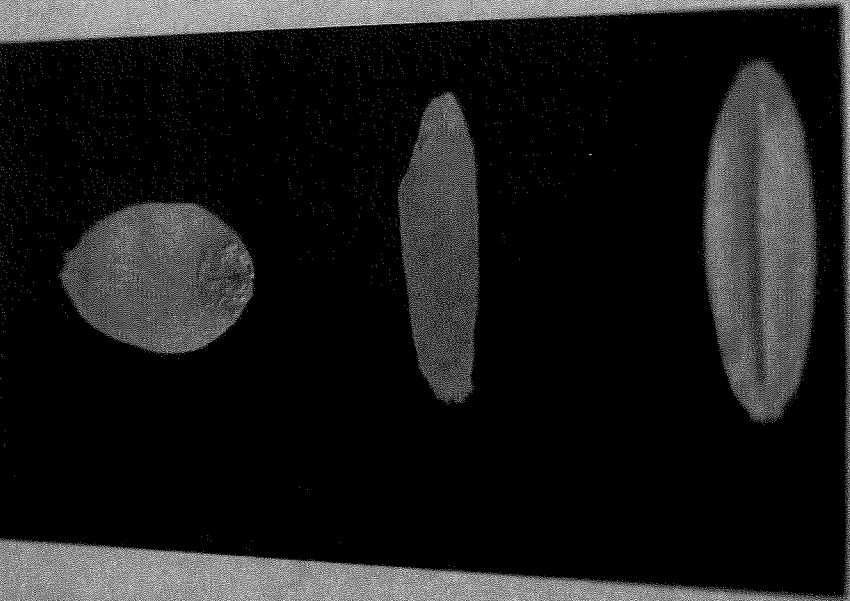

sharp to semi-rounded
one side is wider than the other
sharp checks have a subtle disorientation

Creases

rounded to slightly not right

Hill 81

SWH
