

Nutrition Team Activity

Team _____ **Activity Leader Initials:** _____

After examining the 5 products and their description, please select a feed that would most appropriate for the following scenario (5 points each):

1. You have a 20 year-old gelding that is having problems digesting hay. You need to select a feed that will be easy to digest and be considered a complete feed. What feed would you select?
2. You have a foundered horse that you are treating. You would like to select a feed that is low in starch. What is the most appropriate feed for this horse?
3. You are a broodmare manager for a breeding farm and you are feeding mares with foals approximately 2 months old at their side. What is the best feed for theses mares and their foals?
4. You have a rope horse that you are roping on two nights a week in the practice pen and taking him to jackpots on the weekend. What is the best feed for this horse?
5. Your western pleasure horse is a little thin. You would still like to continue to keep him in show-ready condition but need to put about fifty pounds on him. What is the best feed for this horse?

6. Please identify the type of hay displayed:

7. Please identify the type of hay displayed:

8. Please identify the type of grain displayed:

9. Please identify the type of grain displayed:

10. Please identify the type of grain displayed.
