

2014 National FFA Horse Evaluation Career Development Event

Team Activity – Part 2 Team Scenario and Presentation – 50 Points

Teams will have ten minutes to organize and prepare information and ten minutes to present solutions to judges. This part of the team activity requires all members of the team to work cooperatively to complete the problem-solving portion. Teams will orally present solutions to problems found in the given scenario. Judges may ask clarifying questions to the teams.

a. Health/Facility – Management

You are the manager of one of the premier showing and breeding barns in the United States. At your facility you are in charge of the training/boarding barn and then also breeding and managing about twenty broodmares. Your mares are healthy and are about to start foaling and it is show season for all your show horses. A group of clients who board and show out of your barn have just returned from a week long show held in Minnesota. You notice about ten days after your clients return from the show that two of the show horses have developed signs of fever, excessive salivation, blister-like lesions on their dental pad, tongue, and coronary band. You are worried as to what disease might be spreading through the barn, and start to answer the following questions:

1. What do you think is the problem? Why?
2. How would you treat this after you make the diagnosis?
3. What other short-term and long-term preventative practices would you make to insure the problem does not arise again?
4. What else would you ask?

Team Scenario/ Presentation 50

Team Scenario Grading Rubric

Team: _____

Team Activity – Part 2 Team Scenario and Presentation – 50 Points

Teams will have ten minutes to organize and prepare information and ten minutes to present solutions to judges. This part of the team activity requires all members of the team to work cooperatively to complete the problem-solving portion.
