6	8.0	143	160	13	112
7	5.9	162	130	8	102
8	6.6	151	152	12	106

*SPI stands for Sow Productivity Index

Rank these gilts as they should be selected for a purebred swine operation in the Eastern Midwest. These gilts will be mated to current Yorkshire sires utilizing Artificial Insemination. Special emphasis is placed on maternal traits. This operation's primary profit center involves marketing exceptional females through online showpig prospect sales for the National Junior Swine Association (NJSA) Sweepstakes circuit. The producer also markets elite boars to boar studs and other producers at NSR Type Conferences and Sales. All remaining offspring are marketed to local 4-H and FFA members. All hogs are raised in total confinement.

Providers of Yorkshire Gilts:

Flash Farms
The Ron Flaspohler Family
